

LB 33 that Senator Kremer brought up. This will look at only those bills that propose to increase the power of a state agency and that is precisely what people around the state have been clamoring for for a long time. They said, please be a bit more thoughtful and try to analyze what the effect of the legislation is that sometimes you pass rather hastily. We are not as guilty of this problem I would suggest as the Congress of the United States is, but we do do things to our constituents, our businessmen, our farmers, our ranchers, the people that buy their products without fully understanding precisely what we're doing. Now we're never going to have perfect information, but this will present to us for those bills that cause a regulatory impact, at least a little better understanding of what we might be doing before we do it. This is a bill that is so broadly supported across the state by every sector that one of the Senators here that said something about a motherhood bill, was exactly right and that's why I'm a bit puzzled today by the comments here but I think it's probably due to the fact that we're moving more rapidly on General File and many Senators haven't had a chance to read it. Specifically they haven't had a chance to read lines four through seven on page two. I hope now that you will approve it. It is a very significant bill. It is highly regarded, much needed, has had no opposition to this point and if you have problems with it, come to me with those problems and we'll handle them on Select File as suggested. I don't think you will have problems when you look at the bill and have a chance to read section one. Mr. President, those are my closing remarks. I move for the advancement of the bill to E & R Initial.

PRESIDENT: The question is the advancement of the bill, LB 697. Record your vote. Have you all voted? Senator Schmit, have you voted? Yes, you have. Excuse me. Record.

CLERK: 26 ayes, 0 nays on the advancement of the bill, Mr. President.

PRESIDENT: The bill is advanced. LB 717.

CLERK: Mr. President, (Read title to LB 717). The bill was first read on January 9, 1978. It was referred to the Banking, Commerce and Insurance Committee. The bill was advanced to General File. There are no Committee amendments, Mr. President.

PRESIDENT: Senator John Savage.

SENATOR SAVAGE: Mr. President, members of the Legislature, this is a bill that will make up some time that we killed on this last one. It's a bill I've introduced for the eighth time and I have mixed emotions that it will be my last time to introduce this bill, but it is required every year to give the Building and Loan Associations the same privileges that the Federal Savings and Loan Associations have in regard to the regulations that are put into the law year on the federal. It has never had any opposition. It is just a bill that goes through every year without any problems so I move it be advanced.

PRESIDENT: The question then is the movement of the bill. Record your vote. Please vote. Record.
